

Animals including humans – Year 1

Key vocabulary to describe the features of your body	
head	body
eyes	ears
mouth	teeth
leg	hair

Parts of the human body

Sense	Part of the body it is linked to	
touch		fingers, hands, feet etc
sight		eyes
smell		nose
taste		tongue
hear		ears

Touch – nerves in our skin send messages to our brain which tells us whether something is hot or cold and what it feels like.

Sight – we need light to see things.

Smell – we smell something because it gives off particles that travel to our noses;

Taste – when we eat, the food rubs against our taste buds. This tells our brain to tell us what the taste is.

Hear - Sound is made when something moves or vibrates.
